EXECUTIVE SUMMARY

Woodard & Curran Inc. (Woodard & Curran) was retained by the City of Boston Department of Neighborhood Development (DND) to conduct a Phase I Environmental Site Assessment (Phase I ESA) of 14 Ellington Street in Boston, Massachusetts (the “subject property”). This Phase I ESA was requested in association with evaluation of potential environmental liabilities of the subject property.

Woodard & Curran conducted the Phase I ESA in general accordance with the ASTM “Standard Practice for Environmental Site Assessments E-1527-05” and the United States Environmental Protection Agency (EPA) All Appropriate Inquiry (AAI) rule (40 CFR Part 312). Woodard & Curran evaluated the subject property for evidence of the presence or likely presence of hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of release into structures, soils, groundwater, surface water, or sediments on the subject property. These conditions are referred to in this report as Recognized Environmental Conditions (RECs). The Phase I ESA included a site walkover, historical research, and a review of applicable local, state and federal environmental records.

The subject property consists of a 7,051-square foot parcel of land located on the north side of Ellington Street in Boston, Massachusetts. The subject property is presently developed with a one-story, approximately 1,500 square foot, cement block and steel frame, commercial/auto repair style building with two garage bays. Based on information from historical research sources, the subject property was occupied by a residential dwelling until 1957 when a gasoline service station was constructed on the property. In the 1980’s the property was used for auto repairs and auto sales. The subject property is currently unoccupied. The subject property is owned by the City of Boston.

With exception of small amounts of paint stored in containers less than one-gallon and a two-gallon plastic gasoline container, contents within the building have been removed by the previous occupant. During the site reconnaissance, no evidence of releases of oil and/or hazardous materials was observed during site reconnaissance. The building is currently unheated; however, observations made during site reconnaissance indicate that the building was most recently heated via natural gas. Sanitary wastewater generated at the subject property is discharged to the municipal sewerage system, which is managed by the Massachusetts Water Resources Authority (MWRA). No industrial wastewater is generated on the property based on observations and information collected by Woodard & Curran.

A floor drain was observed inside the garage and an oil-water separator was also observed along the exterior of the garage bays which may be connected to the interior floor drain. Petroleum was observed within the oil-water separator.

Five UST vent pipes were observed along the southeast exterior of the building along the property boundary. Additionally, an approximately six-inch diameter UST fill port was observed in the asphalt-paved driveway near the garage bay doors. Municipal records indicate the subject property was permitted to store 10,000-gallons of gasoline, 500 gallons of waste oil, and 275 gallons of fuel oil in February 1957. A hydraulic lift base was also observed within the garage of the building, which typically contains a hydraulic oil reservoir. The hydraulic lift base was unable to be opened during site reconnaissance.

The subject property is not listed as a release site according to the Massachusetts Department of Environmental Protection (MassDEP) Sites database. However, the subject property is identified as a RCRA Non-Generator site. The RCRA Non-Generator database lists those sites which generate, transport, store, treat and/or dispose of hazardous waste, but do not presently generate hazardous waste.

The property adjoining the subject property to the north is currently unoccupied. However, this property was used for automobile repair and/or as a gasoline filling station. This adjoining property is not listed in the MassDEP Sites database, but it is listed in the UST database.

Except for this adjoining property, nearby properties listed in the environmental databases are not expected to present an environmental concern to the subject property because: i) they are not required to perform further action; ii) the nature of the identified environmental concern does not suggest that the subject property would be impacted; or iii) based upon review, they are too distant and/or hydraulically downgradient or cross gradient relative to the subject property to reasonably affect it.

Based on information reviewed for the Phase I ESA report, the following RECs have been identified in connection with the subject property:

- Historic use and storage of gasoline at the property, including the presence of USTs and fuel dispensers. Based on the observed presence of fill and vent pipes, USTs may be present at the property.
- A floor drain and hydraulic lift base within the garage bays, and an oil-water separator adjacent to the building. These features are potential release locations.
- Gasoline storage and automobile service on the property (8 Old Road) directly north of the subject property.

For this property, Woodard & Curran recommends a subsurface assessment to evaluate:

- The presence or absence of USTs;
- Impact to subsurface soil and/or groundwater attributable to the USTs, floor drain, hydraulic lift base, and oil-water separator; and
- Impact to subsurface soil and/or groundwater attributable to historic activities on the property (8 Old Road) directly north of the subject property.

1. INTRODUCTION

1.1 PURPOSE

Woodard & Curran Inc. (W&C) was retained by the City of Boston Department of Neighborhood Development (DND) (“the Client”) to conduct a Phase I Environmental Site Assessment (Phase I ESA) of 14 Ellington Street in Boston, Massachusetts (the “subject property”). This Phase I ESA was requested in association with evaluation of potential environmental liabilities of the subject property.

The Phase I ESA was conducted in general accordance with the ASTM International “*Standard Practice for Environmental Site Assessments E-1527-05*” and the United States Environmental Protection Agency’s (EPA) All Appropriate Inquiry (AAI) Final Rule (40 CFR Part 312). Good commercial and customary practice for conducting Phase I ESAs has the goal of providing an independent, professional opinion regarding Recognized Environmental Conditions (RECs), as defined by ASTM, associated with the subject property. RECs are defined as:

“the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

Conditions determined to be *de minimis* are not RECs.

As defined by ASTM, *hazardous substance* is a substance defined as hazardous pursuant to the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) 42 USC § 9601(14), and as interpreted by United States Environmental Protection Act (EPA) regulations and the courts. *Petroleum products* are defined as those substances included within the meaning of the petroleum exclusion to CERCLA 42 USC § 9601(14), as interpreted by the courts and EPA, that is: petroleum, including crude oil or any fraction thereof which is not otherwise specifically listed or designated as a hazardous substance under Subparagraphs (A) through (F) of CERCLA 42 USC § 9601(14), natural gas, natural gas liquids, liquefied natural gas, and synthetic gas usable for fuel (or mixtures of natural gas and such synthetic gas).

This Phase I ESA also evaluated historical RECs. ASTM defines an historical REC as

“an environmental condition which in the past would have been considered a recognized environmental condition, but which may or may not be considered a recognized environmental condition currently.” For example, “if a past release of any hazardous substances or petroleum products has occurred in connection with the property and has been remediated, with such remediation accepted by the responsible regulatory agency; this condition shall be considered an historical recognized environmental condition.”

The conclusions of this Phase I ESA are intended to assist the client in evaluating the business environmental risk associated with the property. ASTM defines business environmental risk as

“a risk which can have material environmental or environmentally-driven impact on the business associated with the current or planned use of a parcel of commercial real estate. Considerations of business environmental risk issues may involve addressing one or more non-scope considerations.”

1.2 METHODOLOGY

This Phase I ESA was completed in general accordance with the ASTM International E 1527-05 standard, and the terms and conditions of Woodard & Curran’s proposal to the Client dated March 4, 2010. This Phase I ESA consists of four components: records review, site reconnaissance, interviews, and this report. An Environmental Professional meeting the education, training, and experience requirements as set forth in 40 CFR §312.10(b) and ASTM E 1527-05 completed the assessment and/or reviewed this document.

1.2.1 Records Review

Records reviewed included the following federal, state, tribal, and local databases as maintained by EPA and state, tribal, and local environmental regulatory agencies:

Federal Databases

- National Priorities List (NPL);
- De-listed NPL List;
- Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) list;
- CERCLIS No Further Remedial Action Planned (CERCLIS-NFRAP) list;
- Resource Conservation and Recovery Act (RCRA) Corrective Action Report (RCRA-CORRACTS) list;
- RCRA Non-CORRACTS Treatment Storage and Disposal (TSD) list;
- RCRA generators list;
- Institutional Control/Engineering Control (IC/UC) registries; and
- Emergency Response Notification System (ERNS) list.

State/Tribal/Local Databases

- Hazardous Waste Sites (SHWS) or State/Tribal/Local- equivalent NPL or CERCLIS list;
- Solid Waste Facilities and Landfills (SWF/LF) list;
- Leaking Underground Storage Tanks (LUST);
- Registered Storage Tanks (AST/UST) list;
- Institutional Control/Engineering Control (IC/UC) registries;
- Voluntary Cleanup Sites (VC); and
- Brownfield sites list.

To evaluate the physical setting of the subject property, Woodard & Curran reviewed the following sources, if readily available:

- United States Geological Survey (USGS) topographic maps;
- Aerial photographs; and
- Local soil, geologic, surface water, and groundwater information.

To evaluate the current and historic use of the subject property, Woodard & Curran reviewed the following sources, if readily available:

- Current and historic topographic maps;
- Current and historic aerial photos;
- Sanborn Fire Insurance Maps;
- Street directories;
- Local records including information available from the local Building, Health, and Assessor Departments; and
- Previous environmental reports, if provided.

1.2.2 Site Reconnaissance

Woodard & Curran completed a walkover of the subject property on April 20, 2010 to assess the presence or absence of RECs. The walkover included an evaluation of the following (if present):

- Hazardous substances and petroleum products;
- Underground storage tanks (USTs) and aboveground storage tanks (ASTs);
- On-site wastewater disposal systems;
- Pits, ponds, and lagoons;
- Hydraulic or electrical equipment potentially containing polychlorinated biphenyls (PCBs);
- Stressed vegetation, stained soils, or odors;
- Waste management, including solid waste, wastewater, and hazardous waste;
- Groundwater wells;
- Topography, drainage, impervious surfaces, and buildings; and
- Adjacent property characteristics visible from publicly accessible locations.

1.2.3 Interviews

Woodard & Curran completed reasonable attempts to interview persons with actual or constructive knowledge of current and/or past uses of the subject property and adjacent properties. Woodard & Curran interviewed the following individuals and/or entities:

- Property owner representative; and
- State and/or local government officials (such as tax assessor, health agent, and conservation agent).

1.2.4 Report

This Phase I ESA report prepared by Woodard & Curran includes documentation to support the findings, opinions, and conclusions obtained by the Environmental Professional. Deviations and additions, if any, from the approach presented in ASTM Standard E 1527-05 are listed in detail.

1.3 SIGNIFICANT ASSUMPTIONS

Woodard & Curran made the following assumptions:

- The information obtained from the Client, the Client's representative, individuals interviewed, and prior environmental reports, if any, was considered to be accurate.

- The information provided by the environmental records database vendor and other public record sources is complete and accurate.
- Conditions observed at the subject property were assumed to be representative of areas that were not accessible unless otherwise noted.
- Site specific hydrogeologic information was not publicly available or reasonably ascertainable. In the absence of this site specific information, Woodard & Curran assumes the groundwater flow direction of shallow groundwater beneath the site and in the nearby vicinity mimics the ground surface topography.

1.4 LIMITATIONS AND EXCEPTIONS

The evaluations contained in this Phase I ESA represent Woodard and Curran's professional opinions and judgments based on the current, generally accepted engineering and technical practices for the nature and scope of this Phase I ESA authorized by the Client. This Phase I ESA is based on the conditions observed on the dates of field observation noted and records review as described herein.

The following limitations were encountered during completion of this Phase I ESA:

- Access was not available to conduct interviews with the previous property owners/occupants.

In no event may a Third Party rely on the evaluation, conclusions, and professional opinions presented in the Phase I ESA Report without first obtaining the expressed written consent of Woodard & Curran. Woodard & Curran shall bear no liability for any unauthorized use of the information contained in this report. In the event that new information not contained in this report is obtained relating to environmental or hazardous waste issues at the subject property or nearby, such information shall be brought to Woodard & Curran's attention promptly and Woodard & Curran may, upon evaluation, modify the conclusions stated in this report.

Property access was granted for purposes of reconnaissance and examination of conditions at the subject property. No physical sampling of soil, groundwater, or other materials was conducted during this Phase I ESA. Specific information on the normal practices of property owners and/or occupants with regard to solid waste disposal, on-site use, generation, storage and/or disposal of chemicals or oil and hazardous materials was strictly obtained through review of previous environmental reports and interviews. Additionally, Woodard & Curran has relied on information provided by various officials and other parties as referenced herein. Although believed to be accurate, Woodard & Curran has not attempted to independently verify the accuracy or completeness of information provided by officials and other parties, which was received or reviewed during the course of completing these services.

ASTM E 1527-05 recognizes inherent limitations for Phase I ESAs including:

- Uncertainty Not Eliminated – No environmental site assessment can wholly eliminate uncertainty regarding the potential for RECs in connection with the subject property;
- Not Exhaustive – All appropriate inquiry does not mean exhaustive assessment of a clean property; and
- Level of Inquiry is Variable – Not every property will warrant the same level of assessment. The level of inquiry will depend on the type of property, the user's risk tolerance, and information obtained during the inquiry.

As indicated in the ASTM Standard, there are additional potential environmental issues that are outside of the scope of the ASTM Phase I practice, including asbestos-containing materials, radon, lead-based paint, lead in drinking water, wetlands, regulatory compliance, cultural and historic risks, industrial hygiene, health and safety, ecological resources, endangered species, indoor air quality, biological agents, and mold (E 1527-05). These items were not included in this Phase I ESA.

1.5 SPECIAL TERMS AND CONDITIONS

This Phase I ESA is subject to the terms and conditions of our proposal dated March 4, 2010, which was authorized by the Client on March 24, 2010.

1.6 USER RELIANCE

This Phase I ESA report has been prepared for the exclusive use the City of Boston DND.

2. SITE DESCRIPTION

2.1 LOCATION AND LEGAL DESCRIPTION

2.1.1 Location

The subject property is located at the northeast corner of the intersection of Ellington Street and Old Road in the City of Boston, Suffolk County, Massachusetts. The current owner of the property is listed as the City of Boston by the City of Boston Assessing Department.

Documentation on file at the Suffolk County Registry of Deeds (Book 7386, Page 519) indicates Richard Clouden acquired the property from Choice Developments Inc. on March 5, 1998. In the Registry of Deeds documentation, the subject property is referenced as 14 Ellington Street in Boston, Massachusetts. According to Mr. Don Scott, the Client representative, the subject property was acquired by the City of Boston in February 2010.

The subject property is surrounded by residential and commercial properties. Based on review of a United States Geological Survey topographical map, the subject property is located at 42° 18' 9.0" N latitude, 71° 5' 4.9" W longitude and Universal Transverse Mercator (UTM) Zone 19, coordinates X: 328161.8, Y: 4685254.0. Elevation of the property is approximately 134 feet above sea level. A Site Locus Map is presented as **Figure 1**.

2.1.2 Assessors Identification

The subject property is identified by the City of Boston Assessor as a single parcel with the identification 1402463000. The operating address of the subject property is 14 Ellington Street and the parcel size is 0.16 acres. The subject property is presently developed with one story concrete block building and asphalt paved driveways and parking areas. The Assessors map is presented as **Figure 2**.

2.2 SITE AND GENERAL VICINTY GENERAL CHARACTERISTICS

Old Road abuts the subject property to the west and northwest, beyond which is commercial property and Columbia Road. An asphalt paved parking lot and residential properties abut the subject property to the east and northeast, beyond which is Michigan Avenue. Ellington Street abuts the subject property to the south, beyond which are residential properties. The vicinity of the subject property is characterized by a mixture of commercial and residential properties.

2.3 CURRENT USE OF THE SUBJECT PROPERTY

The subject property is currently unoccupied. A Site Plan is provided as **Figure 3** and an aerial photograph of the property is provided as **Figure 4**.

2.4 DESCRIPTION OF STRUCTURES, ROADS, AND OTHER IMPROVEMENTS ON THE SUBJECT PROPERTY

The subject property is improved with a one story, 1,500-square foot, commercial/auto garage building constructed in the 1950's. The building is constructed of concrete block walls, tar and gravel roof, and a concrete slab-on-grade floor. Exterior portions of the subject property are comprised of approximately

5,000 square feet of asphalt pavement and 600 square feet of concrete slab. Metal fencing surrounds the property. The subject property is accessed through a fence gate along Old Road.

2.5 CURRENT USES OF ADJOINING PROPERTIES

Adjoining/nearby properties were observed from the vantage of the subject property or from public access areas for indications of activities with the potential to pose an environmental concern to the subject property. The uses and features of adjoining/nearby properties are described below:

- North:*** Unoccupied commercial auto repair garage, beyond which is Michigan Avenue.
- Southeast:*** A paved parking lot, beyond which are residential houses.
- South:*** Ellington Street, beyond which are residential houses.
- Southwest:*** Intersection of Old Road and Ellington Street, beyond which is a Health New England Community Clinic Center.
- East/Northeast:*** Residential houses, beyond which is Michigan Avenue.
- West/Northwest:*** Old Road, beyond which is an unoccupied church and various retail businesses.

3. USER-PROVIDED INFORMATION

3.1 TITLE RECORDS

Woodard & Curran was not provided with title records for the subject property and was not engaged by the Client to secure a title report as part of this Phase I Environmental Site Assessment.

3.2 ENVIRONMENTAL LIENS OR USE LIMITATIONS

Woodard & Curran was not made aware of environmental liens recorded for the subject property. An on-line review of Suffolk County Registry of Deed documents conducted by Woodard & Curran did not identify current environmental liens against the property. Furthermore, a review of the Massachusetts Department of Environmental Protection (MassDEP) Sites database did not indicate that the subject property has an activity and use limitation. Other (non environmental) liens were identified in Suffolk County Registry of Deed documents and are summarized in Section 4.4.6 of this report.

3.3 SPECIALIZED KNOWLEDGE

The subject property has been owned by the City of Boston since February 2010. According to the Client Representative, the property has been unoccupied since land taking actions in February 2010 and was previously occupied by an automobile repair and sales business.

3.4 COMMONLY KNOWN OR REASONABLY ASCERTAINABLE INFORMATION

Information provided by the Site Representative is presented in Sections 5 and 6. No other commonly known or reasonably ascertainable information pertaining to the subject property was provided to Woodard & Curran by the Client.

3.5 VALUATION REDUCTION FOR ENVIRONMENTAL ISSUES

No actual knowledge that the value of the subject property is significantly less than the purchase price of comparable properties has been communicated to Woodard & Curran.

3.6 OWNER, PROPERTY MANAGER, OCCUPANT INFORMATION

The subject property is owned by the City of Boston and is currently unoccupied. The subject property was formerly occupied by an automobile repair and sales business. Information obtained during the site walkover is presented in Section 6.

3.7 REASON FOR PERFORMING PHASE I ASSESSMENT

Woodard & Curran understands this Phase I assessment is being completed in association with evaluation of potential environmental liabilities of the subject property.

4. RECORDS REVIEW

4.1 STANDARD ENVIRONMENTAL RECORD SOURCES

Woodard & Curran conducted a search of Federal, Tribal, and State of Massachusetts environmental databases to obtain any listed information concerning the subject property, or within a specified radius of the subject property, as recommended by the ASTM Standard. In addition, state or local supplemental ASTM databases were searched. This database search was conducted through Environmental Data Resources, Incorporated (EDR). The EDR report, which identifies all standard and supplemental state or local ASTM databases reviewed, is provided in Appendix B.

A summary of the database search is provided in the following table:

Environmental Record Source	Report Section	Subject property Listed?	Nearby Properties Listed?
Federal NPL	4.1.1.1	No	No
Federal Proposed NPL	4.1.1.2	No	No
Federal Delisted NPL	4.1.1.3	No	No
Federal CERCLIS	4.1.1.4	No	No
Federal CERCLIS NFRAP	4.1.1.5	No	No
Federal RCRA CORRACTS	4.1.1.6	No	No
Federal RCRA TSD	4.1.1.7	No	No
Federal RCRA Generators	4.1.1.8	No	No
Federal RCRA Non-Generators	4.1.1.9	Yes	Yes
Federal Institutional Control	4.1.1.10	No	No
ERNS	4.1.1.11	No	NA
State Hazardous Waste Sites	4.1.2.1	No	Yes
State Landfill	4.1.2.2	No	No
State Leaking Storage Tanks	4.1.2.3	No	Yes
State Registered Tanks	4.1.2.4	No	Yes
State Institutional Controls	4.1.2.5	No	Yes
State Voluntary Cleanup	4.1.2.6	No	No
State Brownfields	4.1.2.7	No	No
Dry Cleaners	4.1.2.8	No	Yes
Manufactured Gas Plant	4.1.2.9	No	No
Tribal Databases	4.1.3	No	No
Other	4.1.4	No	No

4.1.1 Federal Database Review

4.1.1.1 National Priority List (NPL)

The National Priorities List (NPL) database is a list of known releases associated with abandoned hazardous waste or contamination sites that have been identified for priority remedial actions under the Federal Superfund Program established by the Comprehensive Environmental Response, Compensation and Liability Act of 1980 (CERCLA).

The subject property was not identified in the NPL database, nor was any NPL site identified within a 1-mile radius of the subject property.

4.1.1.2 Proposed NPL

The Proposed National Priorities List (NPL) database is a list of proposed NPL sites.

The subject property was not identified in the proposed NPL database, nor was any Proposed NPL site identified within a 1-mile radius of the subject property.

4.1.1.3 Delisted NPL

The Delisted National Priorities List (NPL) database is a list of sites removed from the NPL list.

The subject property was not identified in the Delisted NPL database, nor was any delisted NPL site identified within a 1-mile radius of the subject property.

4.1.1.4 Comprehensive Environmental Response, Compensation, and Liability Information System (CERCLIS)

The Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) database is a list of potentially contaminated sites brought to the attention of EPA that are suspected or confirmed to have adversely impacted the environment. The CERCLIS database contains sites that are in the EPA screening and assessment process phase (also referred to as a Preliminary Assessment).

The subject property was not identified as a CERCLIS site, nor was any CERCLIS site identified within a 0.5-mile radius of the subject property.

4.1.1.5 CERCLIS No Further Remedial Action Planned Sites

The CERCLIS No Further Remedial Action Planned (NFRAP) database is a list of CERCLIS sites deemed to not require Federal Superfund action following the EPA screening and assessment process. This status does not necessarily mean no hazards are present at the site.

The subject property was not identified as a CERCLIS NFRAP site, nor was any NFRAP site identified within a 0.5-mile radius of the subject property.

4.1.1.6 Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS)

The Resource Conservation and Recovery Act (RCRA) Corrective Action Report (CORRACTS) database is a list of hazardous waste sites/handlers identified as having a RCRA violation and subject to RCRA corrective actions.

The subject property was not identified as a CORRACTS site, nor was any CORRACTS site identified within a 1-mile radius of the subject property.

4.1.1.7 RCRA Treatment Storage Disposal (TSD) Facility

The RCRA Treatment Storage Disposal (TSD) Facility database is a list of sites which treat, store, and/or dispose of hazardous waste.

The subject property was not identified as a TSD site, nor was any TSD site identified within a 0.5-mile radius of the subject property.

4.1.1.8 RCRA Large, Small, and Conditionally Exempt Small Quantity Hazardous Waste Generators

The RCRA Large Quantity Hazardous Waste Generator (LQG), Small Quantity Hazardous Waste Generators (SQG), and Conditionally Exempt Small Quantity Generators (CESQG) databases are lists of sites which generate and/or transport hazardous waste.

The subject property was not identified as a RCRA Generator site, nor was any RCRA Generator site identified within a 0.25-mile radius of the subject property.

4.1.1.9 RCRA Non-Generators

The RCRA Non-Generator database lists those sites which generate, transport, store, treat and/or dispose of hazardous waste, but do not presently generate hazardous waste.

The subject property (listed with the address of 10 Old Road) was identified as a RCRA Non-Generator site. Two RCRA Non-Generator sites were identified within a quarter-mile radius of the subject property.

Table 4-1. RCRA Non-Generator Sites Within 0.25 Mile of Subject Property

Name	Address	Distance	Details
Blue Hill Foreign Auto Inc (Subject Property)	10 Old Road	Subject Property	Handler of ignitable hazardous wastes; no violations listed
Walnut Deluxe Cleaners & Tailors Inc	700 Blue Hill Avenue	About 760 feet south-southwest	Handler of spent halogenated solvents; no violations listed
Mccourt John Co	28 Wolcott Street	About 520 feet east-northeast	No violations listed

Based on the regulatory status and/or their location relative to the subject property, these nearby RCRA-non generator sites are unlikely to pose a threat to the environmental integrity of the subject property.

4.1.1.10 Federal Institutional Control/Engineering Control Registry

The Federal Sites with Institutional Control and Federal Engineering Controls Site List are databases maintained by EPA. The databases contain sites with either institutional or engineering controls in place.

The subject property was not identified in the Institutional Control and Federal Engineering Controls Site database, nor was any nearby property identified within the search radius.

4.1.1.11 Emergency Response Notification System (ERNS)

The Emergency Response Notification System (ERNS) database is a list of reported releases of oil and hazardous materials. The database contains information from spill and emergency response reports prepared by the National Response Center, Department of Transportation, EPA, and the U.S. Coast Guard.

The subject property was not identified in the ERNS database.

4.1.2 State Database Review

4.1.2.1 State Hazardous Waste Sites

The Massachusetts Department of Environmental Protection (MassDEP) maintains a sites database that lists all reportable releases as defined by the Massachusetts Contingency Plan (MCP). The EDR database identifies MCP reportable releases in three databases: the State Hazardous Waste Sites (SHWS), the Releases list, and the former Spills list.

The subject property was not identified in the SHWS database, the Release database, or the Spills database. The SHWS database identified 81 sites within a one-mile radius of the subject property, the Release database identified 126 sites within a one-mile radius of the subject property, and the Spills database identified 17 sites within a 0.5-mile radius of the subject property. It is important to note that many of the sites identified on the SHWS list were often duplicated on the Release list. These sites are assigned unique Release Tracking Numbers (RTN) within the MassDEP database, which references the releases of OHM. The releases reported within a quarter mile are summarized below in Table 4-2.

Table 4-2. Reported Releases at Addresses Within 0.25 Mile of Subject Property

RTN/ Spill ID	Address	Descriptor	Details	Distance
3-0017676	1 Franklin Park Road	Franklin Park Zoo	Class A-1 RAO; asbestos release	0.07 miles NNW
3-0024680	304 Seaver Street	Blue Elm United Estates	Class A-2 RAO; oil release	0.18 miles N
3-0021155	Blue Hill Avenue/Seaver	No Location Aid	Class A-1 RAO; gasoline release from vehicle	0.19 miles N
N91-1215	111 Ellington Street	No Location Aid	Case Closed; #2 fuel oil release	0.17 miles ESE
N82-5256	116 Ellington Street	No Location Aid	Case Closed; polyethylene release	0.17 miles ESE
3-0017737	538 Blue Hill Avenue	No Location Aid	Class A-2 RAO; oil release from UST	0.25 miles N

Key: RAO = Response Action Outcome (site closure document)
RTN = Release Tracking Number

All sites listed above have reached regulatory closure with a Response Action Outcome Statement or are adequately regulated. Based on the regulatory status and/or their location relative to the subject property, these nearby release sites are unlikely to pose a threat to the environmental integrity of the subject property.

4.1.2.2 State Landfill and/or Solid Waste Disposal Sites

The landfill and solid waste disposal sites database is a registry of permitted solid waste disposal facilities or landfills.

According to the EDR database, the subject property was not identified in the landfill database. No state landfill or solid waste disposal site was identified within a 0.5-mile radius of the subject property.

4.1.2.3 State Leaking Storage Tank Lists

The Leaking Aboveground Storage Tank (LAST) list and Leaking Underground Storage Tank (LUST) list include sites in the MassDEP release database that have either an AST or UST identified as the source.

The subject property was not identified as a LUST or LAST site. Information provided by EDR supplemented with information obtained from Woodard & Curran’s review of the MassDEP BWSC identified twelve LUST sites and one LAST site within half a mile of the subject property. These sites are summarized below in Table 4-3 below.

Table 4-3. LUST and LAST Sites Within 0.5 miles of Subject Property

Address	Site	Distance from Subject Property	Details
538 Blue Hill Avenue	No Location Aid	0.25 miles N	Class A-2 RAO
125 Elm Hill Avenue	Holgate Housing Development	0.45 miles NNW	Class A-2 RAO
760 Blue Hill Avenue	No Location Aid	0.28 miles SSW	Class B-1 RAO
26 Wales Street	No Location Aid	0.35 miles S	Class A-2 RAO
783 Blue Hill Avenue	Mobil Station #01-362	0.35 miles SSW	Class A-3 RAO; AUL has been implemented
783 Blue Hill Avenue	Mobil Gas Station	0.35 miles SSW	RAO not required
36 Washington Street	Bilodeau Road	0.38 miles NNE	Class A-1 RAO
85 Esmond Street	Franklin Park Apartments	0.40 miles S	Phase IV
258-260 Washington Street	Atlantic Metal Industries	0.42 miles E	Not a disposal site- MassDEP determined
35 Geneva Avenue	No Location Aid	0.43 miles NNE	Class A-2 RAO
464 Blue Hill Avenue	C/O Boston	0.47 miles NNE	Class A-2 RAO
285 Washington Street	No Location Aid	0.47 miles ESE	Class A-2 RAO

Note: RAO = Response Action Outcome (site closure document)
AUL = Activity and Use Limitation

Based on the regulatory status of these sites and/or their location relative to the subject property, these nearby release sites are unlikely to pose a threat to the environmental integrity of the subject property.

4.1.2.4 State Registered Storage Tank Lists

Registered storage tank lists are databases of USTs and ASTs that are required to be registered with the state. Registered USTs are regulated under Subtitle I of RCRA, and are registered with the Massachusetts Fire Marshall. Some USTs and ASTs may not be registered due to use and size measures within the applicable state regulations.

There are no registered USTs or ASTs listed for the subject property. There are two registered UST sites and one AST site located within a 0.25-mile radius of the subject property. These sites are listed in Table 4-4.

Table 4-4. UST and AST Sites Within 0.25 miles of Subject Property

Address	Site	Distance from Subject Property	Details
8 Old Road	Settles & Thompson Mobil Service	0.02 miles N	(6) 5,000-gallon gasoline USTs removed
538 Blue Hill Avenue	Edward Murray's Service Station	0.25 miles N	(2) 3,000-gallon gasoline USTs removed (1) 4,000-gallon gasoline UST removed (1) 500-gallon fuel oil UST in use (1) 250-gallon waste oil UST in use
1 Franklin Park Road	Zoo New England	0.07 miles NNW	(1) 500-gallon diesel AST in use

Based on these sites' regulatory status and/or distance from the subject property, these sites are unlikely to pose a significant threat to the environmental integrity of the subject property.

4.1.2.5 State Institutional Control/Engineering Control Registry

The Institutional Control and Engineering Control Registry lists sites with Activity and Use Limitations (AUL).

The subject property was not identified in the Institutional Control database. One AUL site was identified within a 0.5-mile radius of the subject property. The site, listed as "Mobil Station #01-362", is located at 783 Blue Hill Avenue, approximately 0.35 miles SSW of the subject property. The site has reached regulatory closure in the form of a Class A-3 RAO.

Based on the site's regulatory status and location relative to the subject property, this site is unlikely to pose a significant threat to the environmental integrity of the subject property.

4.1.2.6 Voluntary Cleanup Sites

The State of Massachusetts does not maintain a database identified as voluntary cleanup sites. Sites with reportable releases are identified in the Releases database (Section 4.1.2.1).

4.1.2.7 Brownfield Sites

The State of Massachusetts does not maintain a database identified as Brownfield sites. Sites with reportable releases are identified in the Releases database (Section 4.1.2.1).

No property within a half mile of the subject property was listed in the U.S. Brownfields database.

4.1.2.8 Dry Cleaners

The subject property was not identified by EDR as a dry cleaner. One dry cleaner site was identified within a 0.25-mile radius of the subject property. The site, listed as “Walnut Deluxe Fabricare”, is located at 700 Blue Hill Avenue, approximately 0.15 miles SSW of the subject property. No violations were reported for this facility.

Based on the site’s regulatory status and location relative to the subject property, the site is unlikely to pose a significant threat to the environmental integrity of the subject property.

4.1.2.9 Manufactured Gas Plants

The subject property was not identified by EDR as a former manufactured gas plant, nor was any manufactured gas plant identified within the search radius of the subject property.

4.1.3 Tribal Database Review

Tribal databases identify land listed as Indian land and sites within the Indian land. The subject property is not located within a one-mile radius of designated tribal land. The subject property and surrounding properties are not identified in any tribal databases.

4.1.4 Supplemental Database Review

The EDR Report identifies supplemental federal, state, and/or tribal databases, which are beyond the standard environmental record sources specified in ASTM E 1527-05. These databases are listed within the EDR Report.

The subject property was not identified in any of the supplemental databases.

4.1.5 Orphan Sites

EDR identified 20 Orphan sites in the database search. Orphan sites are sites for which a geographic location cannot be identified because of insufficient address information.

Based on a review of the orphan sites list, it appears that none of the orphan sites are expected to present a concern to the subject property.

4.2 PHYSICAL SETTING

4.2.1 Priority Resources

According to the MassDEP 21E Priority Resource Map, the subject property is not located within a Zone II area, Non-Potential Drinking Water Source Areas, Protected Open Space, Sole Source Aquifers, Public Water Supplies, Interim Wellhead Protection Areas, Medium and High-Yield Aquifers, Wetlands, Protected Open Space, Areas of Critical Environmental Concern, MassDEP Permitted Solid Waste Facilities, or Natural Heritage & Endangered Species Program (NHESP) Habitats and Certified Vernal Pools.

4.2.2 Topography

Woodard & Curran reviewed EDR-provided historic topographic maps dating from 1903 to 1979 as well as current United States Geological Survey (USGS) topographic maps for information on topography and elevation of the subject property. The subject property is located approximately 130 feet above mean sea level. Ellington Street and Old Road are present in all six topographic maps indicating the area was initially developed prior to 1903. The subject property is shown to slope gradually down towards the northwest.

4.2.3 Geology

According to the United States Department of Agriculture's (USDA) Soil Conservation Service, the primary soil type at the subject property is silt loam. The Bedrock Geologic Map of Massachusetts (Zen et al., 1983) indicates that the subsurface material is a Roxbury Conglomerate (conglomerate, sandstone, siltstone, argillite, and melaphyre).

4.2.4 Hydrology

The nearest body of water is Quincy Bay, located approximately 1.5 miles to the southeast. Groundwater likely flows to the northwest in the general vicinity of the subject property based on the local topography. Local groundwater flow may vary due to the presence of underground utilities such as sewers, storm drains, and heterogeneous subsurface soil conditions.

4.3 HISTORICAL USE INFORMATION

4.3.1 Chain of Title

Limited historical ownership information was available from the Suffolk County Registry of Deeds on-line database. The subject property is currently owned by the City of Boston. The City received the property via land-taking in February 2010, although the exact date of the most recent land-taking is not known. An official Chain of Title was not provided to Woodard & Curran for review.

4.3.2 Sanborn Fire Insurance Maps

Woodard & Curran reviewed Sanborn fire insurance maps for the vicinity of the subject property dated 1899, 1931, 1950, 1964, 1989, 1990, 1993, 1994, 1995, 1996, 1998 and 2002. The maps are summarized in Table 4-5 below and are included in Appendix C.

Table 4-5. Sanborn Fire Insurance Maps Review

Date	Description
1899	A residential dwelling is depicted on the southern portion of the subject property. Old Road abuts the property to the west and northwest, beyond which is a writing station store and a restaurant. Dwellings abut the property directly to the north and east. Elmo Street, presently known as Ellington Street, abuts the property to the south beyond which is a residential dwelling with a stable.
1931	Similar to the 1899 map. The residential dwelling is still depicted on the southern portion of the subject property. The northern portion of the property is developed with a seven-car garage. Four gasoline tanks, an auto sales station and a residential dwelling are shown on the property located directly to the northeast of the subject property. Commercial buildings including a fill station with five gasoline tanks, Franklin Park Theatre, an auto repair shop and a 40-car garage are located west of the subject property, just beyond Old Road. Elmo Street, which abuts the subject property to the south, has been renamed Ellington Street.
1950	Similar to the 1931 map. The 40-car garage, located southwest of the subject property, has been converted to an auto repair and service center.
1964	A fill station, office, and undesignated building are located on the central and northeast portion of the subject property. The dwelling and seven-car garage are no longer depicted on the property. The residential property, located directly to the southeast of the subject property, has been converted to a parking lot. Gasoline tanks are no longer depicted on the property located directly to the northeast, which is shown to still be an auto service station. Gasoline tanks are no longer depicted on the filling station located northwest of the subject property.
1989	Similar to the 1964 map. The fill station is no longer depicted on the subject property. The fill station located to the northwest of the subject property is shown to be vacant. The Franklin Park Theatre and auto repair and service center depicted on the 1964 map have been converted to the 1 st Baptist Church and Charles Drew Family Life Center, respectively.
1990	Similar as the 1989 map.
1993	Similar as the 1990 map.
1994	Similar as the 1993 map.
1995	Similar to the 1994 map.
1996	Similar as the 1995 map.
1998	Similar as the 1996 map.
2002	Similar as the 2002 map. The vacant fill station depicted on the 1998 map is not present on the 2002 map.

4.3.3 Aerial Photographs

Historical aerial photographs of the subject property and the surrounding area were requested from Environmental Data Resources, Inc. They provided nine photographs of the Dorchester area spanning from 1938 through 1995. The photos were reviewed and are summarized in Table 4-6 below and are included in Appendix C.

Table 4-6. Historical Aerial Photograph Review

Date	Description
1938	The subject property is developed with a building. Ellington Street and Old Road are present. Residential houses are present to the south and east and a large structure is shown to the west, just beyond Old Road.
1946	Similar to the 1938 photo.
1955	Similar to the 1946 photo.
1960	Similar to the 1955 photo.
1969	Similar to the 1955 photo. The southern portion of the property appears to be undeveloped. A building (the current building at 14 Ellington Street) is depicted on the northern portion of the property.
1978	Similar to the 1969 photo.
1980	Similar to the 1978 photo.
1985	Similar to the 1980 photo.
1995	Similar to the 1985 photo.

The subject property is present on each of the aerial photographs and the layout of downtown Dorchester is generally the same on each of the maps.

Woodard & Curran also reviewed aerial photographs dated 2008 available on Google Earth. The conditions visible on these photos with regards to the subject property are similar to the 1995 photo.

4.3.4 Topographic Maps

Historical USGS topographic maps for the site and vicinity were obtained from EDR and were reviewed by Woodard & Curran. EDR-provided historic topographic maps dating from 1903 to 1979 as well as current United States Geological Survey (USGS) topographic maps for information on topography and elevation of the subject property. The subject property is located approximately 134 feet above mean sea level. Ellington Street (formerly Elmo Street) is depicted in the eight topographic maps reviewed. The subject property is shown to be relatively flat. Small buildings are depicted in the 1903 map (represented as small figures). Buildings are not depicted in the later maps.

4.3.5 City Directories

Woodard and Curran reviewed the city directory summary provided by EDR for the years 1970, 1975, 1985, 1990, 1995, 2000, and 2005. The directories are summarized in Table 4-7 below, and are included in Appendix C.

Table 4-7. Historical City Directory Review

Address on Ellington Street	1970	1975	1985	1990	1995	2000	2005
14	No Listing	No Listing	No Listing	No Listing	No Listing	No Listing	No Listing
15	Residential	No Listing	No Listing	No Listing	Residential	No Listing	No Listing
19	Residential	No Listing	Residential	No Listing	No Listing	Residential	Residential
2	No Listing	No Listing	No Listing	No Listing	No Listing	No Listing	No Listing
20	No Listing	Residential	Residential	Residential	No Listing	Apartments	Apartments
21	Residential	Residential	Residential	Residential	Residential	Residential	No Listing
23	Residential	Residential	Residential	No Listing	No Listing	Apartments	Apartments

The subject property was not listed in city directory for any of the years reviewed. These historical listings are consistent with the current uses of nearby properties.

4.4 LOCAL RECORDS REVIEW

4.4.1 Assessors Office

Assessor's information is referenced in Sections 2.1.2 and 4.3.1.

4.4.2 Fire Department

Woodard & Curran contacted the Fire Prevention Division of the Boston Fire Department to request files pertaining to oil and hazardous material storage, use, or disposal at the subject property. No information pertaining to oil and hazardous materials at the subject property was present in the Fire Department files.

4.4.3 Board of Health

Woodard & Curran contacted the Boston Public Health Commission (BPHC) to request information pertaining to public health issues, complaints, or violations pertaining to the subject property. A letter

dated April 12, 2010 from the BPHC indicates that no information pertaining to oil and hazardous materials was present within the BPHC files for the subject property.

4.4.4 Boston City Archives

Woodard & Curran visited the Boston City Archives to review files pertaining to oil and hazardous material storage, use or disposal at the subject property and any other information that may affect to the environmental integrity of the property. The file contained a seven-car garage and gas permit dated June 27, 1923 and an application to the Building Department dated February 25, 1957 for the storage of 10,000 gallons of gasoline, 500 gallons of waste oil, 500 gallons of motor oil, 275 gallons of fuel oil, 110 gallons of anti-freeze, and 30 gallons of grease.

4.4.5 Boston Inspectional Services Department

Woodard & Curran reviewed the Boston Inspectional Services Department's online permits and applications for the subject property. The file contained 36 documents. Files viewed included:

- Application for Permit to Build – application to build a dwelling on the subject property dated May 24, 1898. Permit granted on May 31, 1898.
- Application for Permit to Build – application to build a seven-car garage dated August 21, 1923. Permit granted on August 25, 1923.
- Application for Permit to Build – application to build a two-bay lubritorium and office dated June 5, 1957. Permit granted on June 11, 1957.
- Application for Permit for Ordinary Repairs – application to take down dwelling and garage structure on property – dated June 18, 1957.
- Applications to change occupancy from a gasoline service station to a repair garage with accessory office dated between 1985 to 1987. Applications denied.
- Inspector's Violation Reports - failure to secure a building permit to operate auto repair and body shop dated December 11, 1987 and January 04, 1988.
- Application for Permit for Alterations, Repairs, or Change of Occupancy – application to change occupancy to Repair Shop Garage and Accessory Office. Permit granted on February 16, 1989

4.4.6 Suffolk County Registry of Deeds

The following information was reviewed for the subject property from the Suffolk County Registry of Deeds:

- A deed recorded March 18, 1987 transferring the property to Choice Developments, Inc.
- A land court notice dated January 18, 1990.
- A property taking notice from the Boston Water and Sewer Commission dated November 21, 1996.
- A deed recorded February March 3, 1998 transferring the property from Choice Developments, Inc. to Richard Clouden.
- A municipal lien from the Boston Water and Sewer Commission dated January 29, 1998.

- A child support lien dated August 7, 2001.
- A child support lien dated January 29, 2002.

4.5 SUMMARY OF SITE USES

The subject property is presently developed with a one story, approximately 1,500-square foot auto garage style structure constructed in the 1950's. The property is further developed with asphalt paved driveways, concrete slab, and parking areas. According to historical research sources, the subject property was occupied by a residential dwelling until 1957 when a gasoline service station was constructed on the property. In the 1980's, the property was used for auto repairs and auto sales.

4.6 SUMMARY OF SURROUNDING LAND USES

The subject property is surrounded by commercial properties to the northwest, west, and southwest and residential properties to the northeast, east, and southeast. A paved parking lot is located directly east and southeast of the subject property.

5. PREVIOUS ENVIRONMENTAL REPORTS

Woodard & Curran was not provided previous environmental reports for the subject property from the Client.

6. SITE RECONNAISSANCE

Mr. Daniel Clinton of Woodard & Curran conducted the site reconnaissance on April 20, 2010. Photographs taken during the site reconnaissance are included in this report.

6.1 INTERVIEW

Woodard & Curran discussed site conditions and historical operations with Mr. Don Scott, a representative of The City of Boston Department of Neighborhood Development. The City of Boston is the current owner of the subject property.

6.2 GENERAL OBSERVATIONS

Weather during the property reconnaissance was sunny and seasonal - in the 60's degrees Fahrenheit. Woodard & Curran was accompanied by Mr. Scott and viewed all interior office, garage, storage closet, and exterior areas. With the exception of small amounts of paint stored in containers less than one gallon in volume and a two-gallon plastic gasoline container, contents within the building have been removed by the previous occupant. During the site reconnaissance, no evidence of releases of oil and/or hazardous materials was observed.

The subject property is currently unoccupied. However, signage posted on the building indicates that the subject property had been occupied by an automobile body repair business (Technique Collision). The subject property building is a slab-on grade, single story structure constructed of concrete block and steel frame. The interior portions of the building consist of a bathroom, small office, two garage bays, and a storage closet. A floor drain and hydraulic lift were observed within the garage bay area. The discharge location of the floor drain is unknown. No evidence of former manufacturing processes was observed at the time of the site reconnaissance.

Exterior portions consist of asphalt pavement and an approximately 600-square foot concrete slab. The concrete slab is likely related to the former gasoline filling station at the subject property. A commercial storage container was observed along the southern boundary of the subject property. A manhole (later discovered to be an access point to an oil-water separator) and a fill port to a UST were observed along the exterior of the garage bays. These items are discussed below. A small quantity of solid waste (glass, plastic, and paper) was also observed on the exterior portions of the subject property.

6.3 HEATING SOURCE

The building is currently not heated. However, observations made during reconnaissance indicate that the building is connected to natural gas service.

6.4 SOLID WASTE

The subject property is not occupied and solid waste is currently not generated at the subject property.

6.5 WASTEWATER

Sanitary wastewater generated at the subject property is discharged to the municipal sewerage system, which is managed by the Boston Water and Sewer Commission and the Massachusetts Water Resources

Authority (MWRA). A floor drain was observed inside the garage. The discharge location of this floor drain is unknown. However, an oil-water separator was also observed along the exterior of the garage bays and may be connected to the interior floor drain. Two pipes were observed inside the oil-water separator and it is unknown where these pipes originate or discharge. Petroleum was observed within the oil-water separator during reconnaissance.

6.6 STORMWATER DRAINAGE SYSTEM

Storm water flows off paved surfaces to catch basins on Ellington Street and Old Road.

6.7 WATER SUPPLY

Municipal water is supplied to the building by MWRA.

6.8 HAZARDOUS SUBSTANCES AND PETROLEUM PRODUCTS

With exception to small amounts of paint stored in containers less than one gallon (manufacturer-supplied containers) in size and a two-gallon plastic gasoline container, contents within the building have been removed by the previous occupant. During the site reconnaissance, no evidence of releases of oil and/or hazardous materials was observed.

6.9 UNDERGROUND STORAGE TANKS

Five UST vent pipes were observed along the southeast exterior of the building along the property boundary. Additionally, an approximately six-inch diameter UST fill port was observed in the asphalt paved driveway in the vicinity of the garage bay doors. Municipal records indicate the subject property was permitted to store 10,000 gallons of gasoline, 500 gallons of waste oil, and 275 gallons of fuel oil in February 1957.

6.10 ABOVEGROUND STORAGE TANKS

No current ASTs were observed or reported to be located at the subject property.

6.11 TRANSFORMERS

Transformers were not observed at the subject property or along the subject property boundary.

6.12 ODORS

No strong, pungent, or noxious odors were noted in the exterior of the subject property.

6.13 POOLS OF LIQUID

Pools of liquid were not observed at the subject property.

6.14 SOIL AND PAVEMENT STAINING

No soil staining relating to a release of hazardous substances or petroleum products were observed or reported at the subject property.

6.15 PITS, PONDS, OR LAGOONS

No pits, ponds, or lagoons were observed at the subject property.

6.16 WELLS

Wells were not observed at the subject property.

6.17 OTHER

A hydraulic lift base was observed within the garage of the building. The lift base was unable to be opened during reconnaissance. However, hydraulic oil is typically stored within a reservoir inside hydraulic lift bases. A storage container was also observed at the subject property. The container was empty of contents.

7. INTERVIEWS

7.1 INTERVIEW WITH OWNER

Information obtained from the City of Boston is presented in Section 2.

7.2 INTERVIEW WITH SITE MANAGER

Woodard & Curran interviewed Mr. Don Scott, the site manager for the City of Boston. Mr. Scott indicated that the subject property had recently been acquired through land taking in February 2010 and that the former owner had operated an automobile service, repair, and sales business. Mr. Scott indicated that the subject property is currently unoccupied.

7.3 INTERVIEWS WITH OCCUPANTS

The subject property is currently unoccupied.

7.4 INTERVIEWS WITH LOCAL GOVERNMENT OFFICIALS

Interviews with local government officials are presented in Section 4.4.

8. FINDINGS AND CONCLUSIONS

Woodard & Curran was retained by the City of Boston to conduct a Phase I ESA of the 14 Ellington Street property in the Dorchester neighborhood of Boston, Suffolk County, Massachusetts. This Phase I ESA was requested in association with evaluation of potential environmental liabilities of the subject property. Woodard & Curran conducted the Phase I ESA in general accordance with the ASTM “Standard Practice for Environmental Site Assessments E-1527-05” and the EPA’s AAI Final Rule (40 CFR Part 312). Woodard & Curran evaluated the subject property for evidence of the presence or likely presence of hazardous substances or petroleum products under conditions that indicate an existing release, a past release, or a material threat of release into structures, soils, groundwater, surface water, or sediments on the subject property. These conditions are referred to in this report as Recognized Environmental Conditions (RECs). The Phase I ESA included a site walkover, historical research, and a review of applicable local, state and federal environmental records.

Woodard & Curran’s summary of the overall findings and conclusions are presented below.

8.1 FINDINGS

- The 0.16-acre subject property is situated on the northern side of Ellington Street is improved with a 1,500-square foot, one story commercial style building with two garage bays constructed in 1957. The subject property is currently unoccupied and owned by the City of Boston.
- Prior to 1957, the property was developed with a residential dwelling. Subsequently, the subject property was occupied by various businesses, including an automobile repair business and gasoline filling station, based on municipal records. The subject property is serviced by the municipal water and sewer systems. The building is currently unheated. Based on subject property reconnaissance, it appears the building was most recently heated via natural gas.
- Based upon available information, storage and use of oil and hazardous materials has occurred at the subject property. City Archives information suggests that the subject property was permitted to store 10,000 gallons of gasoline, 500 gallons of waste oil, 500 gallons of motor oil, 275 gallons of fuel oil, 110 gallons of anti-freeze, and 30 gallons of grease in June 1957.
- The subject property is identified as a RCRA Non-Generator site. The RCRA Non-Generator database lists those sites which generate, transport, store, treat and/or dispose of hazardous waste, but do not presently generate hazardous waste. The subject property was not identified as a release site according to the MassDEP release site database.
- With the exception of a small quantity of paint stored within manufacturer-supplied containers and a two-gallon plastic gasoline container, building contents have been removed by the previous occupant. During the site reconnaissance, no evidence of releases of oil and/or hazardous materials was observed.
- A floor drain was observed inside the garage. The discharge location of this floor drain is unknown.
- An oil-water separator was observed along the exterior of the garage bays and may be connected to the interior floor drain. Two pipes were observed inside the oil-water separator and it is unknown where these pipes originate or discharge. Petroleum was observed within the oil-water separator during reconnaissance.
- Five UST vent pipes were observed at the southeast exterior of the building along the property boundary. Additionally, an approximately six-inch diameter UST fill port was observed in the

asphalt paved driveway in the vicinity of the garage bay doors. Municipal records indicate the subject property was permitted to store 10,000 gallons of gasoline, 500 gallons of waste oil, and 275 gallons of fuel oil in February 1957.

- A hydraulic lift base was observed within the garage of the building. The lift base was unable to be opened during reconnaissance.
- A commercial storage container is present on the property. The container was empty of contents.
- The 8 Old Road property adjoining the subject property to the north is currently unoccupied. However, this property appears to have been utilized for automobile repair and/or as a gasoline filling station.

8.2 CONCLUSIONS

Based on information reviewed for the Phase I ESA report, the following RECs have been identified in connection with the subject property:

- Historic use and storage of gasoline at the property, including the presence of USTs and fuel dispensers. Based on the observed presence of fill and vent pipes, USTs may be present at the property.
- A floor drain and hydraulic lift base within the garage bays, and an oil-water separator adjacent to the building. These features are potential release locations.
- Gasoline storage and automobile service on the property (8 Old Road) directly north of the subject property.

8.3 RECOMMENDATIONS

For this property, Woodard & Curran recommends a subsurface assessment to evaluate:

- The presence or absence of USTs;
- Impact to subsurface soil and/or groundwater attributable to the USTs, floor drain, hydraulic lift base, and/or oil-water separator; and
- Impact to subsurface soil and/or groundwater attributable to historic activities on the property directly north of the subject property.

9. DATA GAPS

Woodard & Curran was unable to interview previous owners and occupants of the property as their contact information was neither provided nor encountered during Phase I research.

The aforementioned data gaps are anticipated to have little impact on the findings and conclusions of this report, as supporting information was found through other resources.

10. SIGNATURES

Mr. Daniel Clinton, who is an Environmental Professional whose signature is affixed below, conducted the site visit, conducted the records search review, and wrote the Phase I ESA for 14 Ellington Street in Boston, Massachusetts. Mr. Robert McGrath, who is also an Environmental Professional and Vice President of Woodard & Curran, reviewed this report for quality assurance.

I declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in § 312.10 of this part. I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. I have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Robert W. McGrath
Vice President
Woodard & Curran

Daniel R. Clinton

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property. Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent CERCLIS

SHWS: Contains information on releases of oil and hazardous materials that have been reported to DEP.

A review of the SHWS list, as provided by EDR, and dated 02/12/2010 has revealed that there are 81 SHWS sites within approximately 1 mile of the target property.

EXECUTIVE SUMMARY

State and tribal institutional control / engineering control registries

INST CONTROL: Activity and Use Limitations establish limits and conditions on the future use of contaminated property, and therefore allow cleanups to be tailored to these uses.

A review of the INST CONTROL list, as provided by EDR, and dated 02/12/2010 has revealed that there is 1 INST CONTROL site within approximately 0.5 miles of the target property.

EXECUTIVE SUMMARY

Other Ascertainable Records

RCRA-NonGen: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA-NonGen list, as provided by EDR, and dated 01/13/2010 has revealed that there are 3 RCRA-NonGen sites within approximately 0.25 miles of the target property.

<u>Equal/Higher Elevation</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID</u>	<u>Page</u>

Environmental Interest/Information System

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System

AFS (Aerometric Information Retrieval System (AIRS) Facility Subsystem) replaces the former Compliance Data System (CDS), the National Emission Data System (NEDS), and the Storage and Retrieval of Aerometric Data (SAROAD). AIRS is the national repository for information concerning airborne pollution in the United States. AFS is used to track emissions and compliance data from industrial plants. AFS data are utilized by states to prepare State Implementation Plans to comply with regulatory programs and by EPA as an input for the estimation of total national emissions. AFS is undergoing a major redesign to support facility operating permits required under Title V of the Clean Air Act.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Compliance Status:

Tier II, A site/release receiving a total NRS score of less than 350, unless the site meets any of the Tier 1 Inclusionary Criteria (see above). Permits are not required at Tier 2 sites/releases and response actions may be performed under the supervision of an LSP without prior DEP approval. All pre-1993 transition sites that have accepted waivers are categorically Tier 2 sites.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 12/01/2009	Source: EPA
Date Data Arrived at EDR: 01/14/2010	Telephone: N/A
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 03/03/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

Date of Government Version: 12/01/2009	Source: EPA
Date Data Arrived at EDR: 01/14/2010	Telephone: N/A
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 03/03/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal Delisted NPL site list

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 12/01/2009	Source: EPA
Date Data Arrived at EDR: 01/14/2010	Telephone: N/A
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 03/03/2010
Number of Days to Update: 35	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

Federal CERCLIS list

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/30/2009	Source: EPA
Date Data Arrived at EDR: 08/11/2009	Telephone: 703-412-9810
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 02/09/2010
Number of Days to Update: 41	Next Scheduled EDR Contact: 04/12/2010
	Data Release Frequency: Quarterly

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of NPL and Base Realignment & Closure sites found in the CERCLIS database where FERRO is involved in cleanup projects.

Date of Government Version: 06/23/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: 703-603-8704
Date Made Active in Reports: 02/10/2010	Last EDR Contact: 01/15/2010
Number of Days to Update: 26	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Varies

Federal CERCLIS NFRAP site List

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 06/23/2009	Source: EPA
Date Data Arrived at EDR: 09/02/2009	Telephone: 703-412-9810
Date Made Active in Reports: 09/21/2009	Last EDR Contact: 03/11/2010
Number of Days to Update: 19	Next Scheduled EDR Contact: 06/14/2010

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 01/13/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: (888) 372-7341
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 02/19/2010
Number of Days to Update: 34	Next Scheduled EDR Contact: 04/19/2010

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

Date of Government Version: 01/13/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: (888) 372-7341
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 02/19/2010
Number of Days to Update: 34	Next Scheduled EDR Contact: 04/19/2010
	Data Release Frequency: Quarterly

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

Date of Government Version: 01/13/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: (888) 372-7341
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 02/19/2010
Number of Days to Update: 34	Next Scheduled EDR Contact: 04/19/2010
	Data Release Frequency: Quarterly

RCRA-CESQG: RCRA - Conditionally Exempt Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

Date of Government Version: 01/13/2010	Source: Environmental Protection Agency
Date Data Arrived at EDR: 01/15/2010	Telephone: (888) 372-7341

Federal institutional controls / engineering controls registries

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 10/01/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2009	Telephone: 703-603-0695
Date Made Active in Reports: 11/09/2009	Last EDR Contact: 03/15/2010
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/28/2010
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 10/01/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 10/09/2009	Telephone: 703-603-0695
Date Made Active in Reports: 11/09/2009	Last EDR Contact: 03/15/2010
Number of Days to Update: 31	Next Scheduled EDR Contact: 06/28/2010
	Data Release Frequency: Varies

Federal ERNS list

ERNS: Emergency Response Notification System

Emergency Response Notification System. ERNS records and stores information on reported releases of oil and hazardous substances.

Date of Government Version: 12/31/2009	Source: National Response Center, United States Coast Guard
Date Data Arrived at EDR: 01/22/2010	Telephone: 202-267-2180
Date Made Active in Reports: 02/11/2010	Last EDR Contact: 01/15/2010
Number of Days to Update: 20	Next Scheduled EDR Contact: 04/19/2010
	Data Release Frequency: Annually

State- and tribal - equivalent CERCLIS

SHWS: Site Transition List

Contains information on releases of oil and hazardous materials that have been reported to DEP.

Date of Government Version: 02/12/2010	Source: Department of Environmental Protection
Date Data Arrived at EDR: 02/19/2010	Telephone: 617-292-5990
Date Made Active in Reports: 02/25/2010	Last EDR Contact: 02/19/2010
Number of Days to Update: 6	Next Scheduled EDR Contact: 05/03/2010
	Data Release Frequency: Quarterly

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: Solid Waste Facility Database/Transfer Stations

Solid Waste Facilities/Landfill Sites. SWF/LF type records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. Depending on the state, these may be active or inactive facilities or open dumps that failed to meet RCRA Subtitle D Section 4004 criteria for solid waste landfills or disposal sites.

Date of Government Version: 01/01/2010	Source: Department of Environmental Protection
Date Data Arrived at EDR: 01/13/2010	Telephone: 617-292-5989
Date Made Active in Reports: 01/28/2010	Last EDR Contact: 01/13/2010
Number of Days to Update: 15	Next Scheduled EDR Contact: 04/26/2010
	Data Release Frequency: Quarterly

State and tribal leaking storage tank lists

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

LUST: Leaking Underground Storage Tank Listing

Sites within the Leaking Underground Storage Tank Listing that have a UST listed as its source.

Date of Government Version: 02/12/2010	Source: Department of Environmental Protection
Date Data Arrived at EDR: 02/19/2010	Telephone: 617-292-5990
Date Made Active in Reports: 02/25/2010	Last EDR Contact: 02/19/2010
Number of Days to Update: 6	Next Scheduled EDR Contact: 05/03/2010
	Data Release Frequency: Quarterly

LAST: Leaking Aboveground Storage Tank Sites

Sites within the Releases Database that have a AST listed as its source.

Date of Government Version: 02/12/2010	Source: Department of Environmental Protection
Date Data Arrived at EDR: 02/19/2010	Telephone: 617-292-5500
Date Made Active in Reports: 02/25/2010	Last EDR Contact: 02/19/2010
Number of Days to Update: 6	Next Scheduled EDR Contact: 05/03/2010

INDIAN LUST R7: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Iowa, Kansas, and Nebraska

Date of Government Version: 03/24/2009	Source: EPA Region 7
Date Data Arrived at EDR: 05/20/2009	Telephone: 913-551-7003
Date Made Active in Reports: 06/17/2009	Last EDR Contact: 02/01/2010
Number of Days to Update: 28	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Varies

INDIAN LUST R6: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in New Mexico and Oklahoma.

Date of Government Version: 11/12/2009	Source: EPA Region 6
Date Data Arrived at EDR: 11/12/2009	Telephone: 214-665-6597
Date Made Active in Reports: 12/16/2009	Last EDR Contact: 02/01/2010
Number of Days to Update: 34	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Varies

INDIAN LUST R1: Leaking Underground Storage Tanks on Indian Land

A listing of leaking underground storage tank locations on Indian Land.

Date of Government Version: 02/19/2009	Source: EPA Region 1
Date Data Arrived at EDR: 02/19/2009	Telephone: 617-918-1313
Date Made Active in Reports: 03/16/2009	Last EDR Contact: 03/01/2010
Number of Days to Update: 25	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Varies

INDIAN LUST R10: Leaking Underground Storage Tanks on Indian Land

LUSTs on Indian land in Alaska, Idaho, Oregon and Washington.

Date of Government Version: 02/02/2010	Source: EPA Region 10
Date Data Arrived at EDR: 02/03/2010	Telephone: 206-553-2857
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 02/01/2010
Number of Days to Update: 15	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Quarterly

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

INDIAN LUST R9: Leaking Underground Storage Tanks on Indian Land
LUSTs on Indian land in Arizona, California, New Mexico and Nevada

Date of Government Version: 11/24/2009	Source: Environmental Protection Agency
Date Data Arrived at EDR: 11/25/2009	Telephone: 415-972-3372
Date Made Active in Reports: 12/16/2009	Last EDR Contact: 02/01/2010
Number of Days to Update: 21	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Quarterly

INDIAN LUST R4: Leaking Underground Storage Tanks on Indian Land
LUSTs on Indian land in Florida, Mississippi and North Carolina.

Date of Government Version: 12/07/2009	Source: EPA Region 4
Date Data Arrived at EDR: 12/09/2009	Telephone: 404-562-8677
Date Made Active in Reports: 12/16/2009	Last EDR Contact: 02/01/2010
Number of Days to Update: 7	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Semi-Annually

State and tribal registered storage tank lists

UST: Summary Listing of all the Tanks Registered in the State of Massachusetts
Registered Underground Storage Tanks. UST's are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA) and must be registered with the state department responsible for administering the UST program. Available information varies by state program.

Date of Government Version: 01/21/2010	Source: Department of Fire Services, Office of the Public Safety
Date Data Arrived at EDR: 01/28/2010	Telephone: 978-567-3715

INDIAN UST R4: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 4 (Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee and Tribal Nations)

Date of Government Version: 12/07/2009	Source: EPA Region 4
Date Data Arrived at EDR: 12/09/2009	Telephone: 404-562-9424
Date Made Active in Reports: 12/16/2009	Last EDR Contact: 02/01/2010
Number of Days to Update: 7	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Semi-Annually

INDIAN UST R1: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 1 (Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont and ten Tribal Nations).

Date of Government Version: 02/19/2009	Source: EPA, Region 1
Date Data Arrived at EDR: 02/19/2009	Telephone: 617-918-1313
Date Made Active in Reports: 03/16/2009	Last EDR Contact: 03/01/2010
Number of Days to Update: 25	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Varies

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

INDIAN UST R10: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 10 (Alaska, Idaho, Oregon, Washington, and Tribal Nations).

Date of Government Version: 02/02/2010	Source: EPA Region 10
Date Data Arrived at EDR: 02/03/2010	Telephone: 206-553-2857
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 02/17/2010
Number of Days to Update: 15	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Quarterly

INDIAN UST R7: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 7 (Iowa, Kansas, Missouri, Nebraska, and 9 Tribal Nations).

Date of Government Version: 04/01/2008	Source: EPA Region 7
Date Data Arrived at EDR: 12/30/2008	Telephone: 913-551-7003
Date Made Active in Reports: 03/16/2009	Last EDR Contact: 02/01/2010
Number of Days to Update: 76	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Varies

INDIAN UST R6: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 6 (Louisiana, Arkansas, Oklahoma, New Mexico, Texas and 65 Tribes).

Date of Government Version: 02/08/2010	Source: EPA Region 6
Date Data Arrived at EDR: 02/09/2010	Telephone: 214-665-7591
Date Made Active in Reports: 02/18/2010	Last EDR Contact: 02/01/2010
Number of Days to Update: 9	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Semi-Annually

INDIAN UST R5: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 5 (Michigan, Minnesota and Wisconsin and Tribal Nations).

Date of Government Version: 11/05/2009	Source: EPA Region 5
Date Data Arrived at EDR: 11/05/2009	Telephone: 312-886-6136
Date Made Active in Reports: 12/16/2009	Last EDR Contact: 02/01/2010
Number of Days to Update: 41	Next Scheduled EDR Contact: 05/17/2010
	Data Release Frequency: Varies

INDIAN UST R9: Underground Storage Tanks on Indian Land

The Indian Underground Storage Tank (UST) database provides information about underground storage tanks on Indian land in EPA Region 9 (Arizona, California, Hawaii, Nevada, the Pacific Islands, and Tribal Nations).

Date of Government Version: 11/12/2009	Source: EPA Region 9
Date Data Arrived at EDR: 11/20/2009	Telephone: 415-972-3368

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients-States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Local Lists of Hazardous waste / Contaminated Sites

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA-NonGen: RCRA - Non Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

Date of Government Version: 10/19/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/01/2007	Telephone: 202-564-2501

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

Date of Government Version: 10/19/2009	Source: EPA
Date Data Arrived at EDR: 10/22/2009	Telephone: (617) 918-1111
Date Made Active in Reports: 12/01/2009	Last EDR Contact: 03/15/2010
Number of Days to Update: 40	Next Scheduled EDR Contact: 06/28/2010
	Data Release Frequency: Quarterly

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing

The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.

EDR PROPRIETARY RECORDS

EDR Proprietary Records

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2007	Source: Department of Environmental Protection
Date Data Arrived at EDR: 08/26/2009	Telephone: 860-424-3375

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation

Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on private school locations in the United States.

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

GEOCHECK[®] - PHYSICAL SETTING SOURCE ADDENDUM

TARGET PROPERTY ADDRESS

14 ELLINGTON STREET
14 ELLINGTON STREET
DORCHESTER, MA 02121

TARGET PROPERTY COORDINATES

Latitude (North):	42.30250 - 42° 18' 9.0"
Longitude (West):	71.0847 - 71° 5' 4.9"
Universal Tranverse Mercator:	Zone 19
UTM X (Meters):	328161.8
UTM Y (Meters):	4685254.0
Elevation:	134 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	42071-C1 BOSTON SOUTH, MA
Most Recent Revision:	1987

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ENE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u> SUFFOLK, MA	FEMA Flood <u>Electronic Data</u> YES - refer to the Overview Map and Detail Map
Flood Plain Panel at Target Property:	2502860015C - FEMA Q3 Flood data
Additional Panels in search area:	2502860016D - FEMA Q3 Flood data 2502860023D - FEMA Q3 Flood data 2502860022C - FEMA Q3 Flood data

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u> EAST HALF OF BOSTON SOUTH	NWI Electronic <u>Data Coverage</u> YES - refer to the Overview Map and Detail Map
---	--

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
1	1/8 - 1/4 Mile South	N
2	1/2 - 1 Mile North	NE

For additional site information, refer to Physical Setting Source Map Findings.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: Newport

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 61 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	9 inches	silt loam	Not reported	Not reported	Max: 1.41 Min: 0	Max: 6 Min: 4.5
2	9 inches	25 inches	channery silt loam	Not reported	Not reported	Max: 1.41 Min: 0	Max: 6 Min: 4.5
3	25 inches	59 inches	channery silt loam	Not reported	Not reported	Max: 1.41 Min: 0	Max: 6 Min: 4.5

Soil Map ID: 2

Soil Component Name: Newport

Soil Surface Texture: silt loam

Hydrologic Group: Class C - Slow infiltration rates. Soils with layers impeding downward movement of water, or soils with moderately fine or fine textures.

Soil Drainage Class: Well drained

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Hydric Status: Unknown

Corrosion Potential - Uncoated Steel: Low

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Map ID: 9

Soil Component Name: Charlton

Soil Surface Texture: fine sandy loam

Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.

Soil Drainage Class: Well drained

Hydric Status: Partially hydric

Corrosion Potential - Uncoated Steel: Low

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Saturated hydraulic conductivity micro m/sec	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil

2	5 inches	35 inches	fine sandy loam	Not reported	Not reported	Max: 42.34 Min: 4.23	Max: 6 Min: 4.5
3	35 inches	59 inches	fine sandy loam	Not reported	Not reported	Max: 42.34 Min: 4.23	Max: 6 Min: 4.5

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 2003 & 2009 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Massachusetts Geographic Information System (MassGIS) Datalayers

Source: Executive Office of Environmental Affairs

Public Water Supply Database: The Public Water Supply datalayer contains the locations of public community surface and groundwater supply sources and public non-community supply sources as defined in 310 CMR 22.00.

OTHER STATE DATABASE INFORMATION

Areas of Critical Environmental Concern Datalayer: The Areas of Critical Environmental Concern (ACEC) datalayer shows the location of areas that have been designated ACECs by the Secretary of Environmental Affairs. ACEC designation requires greater environmental review of certain kinds of proposed development under state jurisdiction within the ACEC boundaries. The ACEC Program is administered by the Department of Environmental Management (DEM) on behalf of the Secretary of Environmental Affairs. The Massachusetts Coastal Zone Management (MCZM) Office managed the original Coastal ACEC Program from 1978 to 1993, and continues to play a key role in monitoring coastal ACECs. Procedures for ACEC designation and the general policies governing the effects of designation are contained in the ACEC regulations (301 CMR 12.00). The ACEC datalayer has been compiled by MCZM and DEM and includes both coastal and inland areas.

EPA Designated Sole Source Aquifers Datalayer: The Sole Source Aquifer datalayer was compiled by the Department of Environmental Protection (DEP) Division of Water Supply (DWS). Seven Sole Source Aquifers have been designated by the US Environmental Protection Agency (EPA) for Massachusetts. A Sole Source Aquifer (SSA) is an aquifer designated by US EPA as the sole or principal source of drinking water for a given aquifer service area; that is, an aquifer which is needed to supply 50% or more of the drinking water for that area and for which there are no reasonably available alternative sources should that aquifer become contaminated. The aquifers were defined by a EPA hydrogeologist.

Aquifers Datalayer: MassGIS produced an aquifer datalayer composed of 20 individual panels, generally based on the boundaries of the major drainage basins. Areas of high and medium yield were mapped. This datalayer includes polygon attribute coding to help in the identification of areas in which cleanup of hazardous waste sites must meet drinking water standards, as defined in the Massachusetts Contingency Plan (MCP) (310 CMR 40.00000).

Non-Potential Drinking Water Source Areas: Non-Potential Drinking Water Source Areas (NPDWSA) are regulatory in nature, representing one of many considerations used in determining the standards to which ground water must be cleaned in the event of a release of oil or hazardous material. NPDWSAs are not based on existing water quality and do not indicate poor ambient conditions.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

DEP Approved Zone IIs Datalayer: The Department of Environmental Protection (DEP) approved Zone IIs datalayer was compiled by the DEP Division of Water Supply (DWS). The database contains 281 approved Zone IIs statewide. As stated in 310 CMR 22.02, a Zone II is "that area of an aquifer which contributes water to a well under the most severe pumping and recharge conditions that can be realistically anticipated (180 days of pumping at safe yield, with no recharge from precipitation.) It is bounded by the groundwater divides which result from pumping the well and by the contact of the aquifer with less permeable materials such as till or bedrock. In some cases, streams or lakes may act as recharge boundaries. In all cases, Zone IIs shall extend up gradient to its point of intersection with prevailing hydrogeologic boundaries (a groundwater flow divide, a contact with till or bedrock, or a recharge boundary)." These data are used in association with the Public Water Supplies datalayer. The following describes certain unique features of this association.

- Any proposed new well which will pump at least 100,000 gallons per day must have a Zone II delineation completed and approved by DEP prior to the well coming on line.
- Additionally, a new source may not be on-line yet, but other, older wells may fall within its Zone II boundary.
- Further, existing wells must have a Zone II delineated as a condition of receiving a water withdrawal permit under the Water Management Act.

RADON

State Database: MA Radon
Source: Department of Health
Telephone: 413-586-7525
Radon Test Results

Area Radon Information

Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.

EPA Radon Zones

Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

The EDR Historical Topographic Map Report

EDR Historical Topographic Map Report

Environmental Data Resources, Inc.s (EDR) Historical Topographic Map Report is designed to assist professionals in evaluating potential liability on a target property resulting from past activities. EDRs Historical Topographic Map Report includes a search of a collection of public and private color historical topographic maps, dating back to the early 1900s.

Thank you for your business.
Please contact EDR at 1-800-352-0050
with any questions or comments.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

2009 Enhancements to EDR City Directory Abstract

New for 2009, the EDR City Directory Abstract has been enhanced with additional information and features. These enhancements will make your city directory research process more efficient, flexible, and insightful than ever before. The enhancements will improve the options for selecting adjoining properties, and will speed up your review of the report.

City Directory Report. Three important enhancements have been made to the EDR City Directory Abstract:

1. *Executive Summary.* The report begins with an Executive Summary that lists the sources consulted in the preparation of the report. Where available, a parcel map is also provided within the report, showing the locations of properties researched.
2. *Page Images.* Where available, the actual page source images will be included in the Appendix, so that you can review them for information that may provide additional insight. EDR has copyright permission to include these images.
3. *Findings Listed by Location.* Another useful enhancement is that findings are now grouped by address. This will significantly reduce the time you need to review your abstracts. Findings are provided under each property address, listed in reverse chronological order and referencing the source for each entry.

Options for Selecting Adjoining Properties. Ensuring that the right adjoining property addresses are searched is one of the biggest challenges that environmental professionals face when conducting city directory historical research. EDR's new enhancements make it easier for you to meet this challenge. Now, when you place an order for the EDR City Directory Abstract, you have the following choices for determining which addresses should be researched.

1. *You Select Addresses and EDR Selects Addresses.* Use the "Add Another Address" feature to specify the addresses you want researched. Your selections will be supplemented by addresses selected by EDR researchers using our established research methods. Where available, a digital map will be shown, indicating property lines overlaid on a color aerial photo and their corresponding addresses. Simply use the address list below the map to check off which properties shown on the map you want to include. You may also select other addresses using the "Add Another Address" feature at the bottom of the list.
2. *EDR Selects Addresses.* Choose this method if you want EDR's researchers to select the addresses to be researched for you, using our established research methods.
3. *You Select Addresses.* Use this method for research based solely on the addresses you select or enter into the system.
4. *Hold City Directory Research Option.* If you choose to select your own adjoining addresses, you may pause production of your EDR City Directory Abstract report until you have had a chance to look at your other EDR reports and sources. Sources for property addresses include: your Certified Sanborn Map Report may show you the location of property addresses; the new EDR Property Tax Map Report may show the location of property addresses; and your field research can supplement these sources with additional address information. To use this capability, simply click "Hold City Directory research" box under "Other Options" at the bottom of the page. Once you have determined what addresses you want researched, go to your EDR Order Status page, select the EDR City Directory Abstract, and enter the addresses and submit for production.

Questions? Contact your EDR representative at 800-352-0050. For more information about all of EDR's 2009 report and service enhancements, visit www.edrnet.com/2009enhancements

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.'s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

RESEARCH SUMMARY

The following research sources were consulted in the preparation of this report. An "X" indicates where information was identified in the source and provided in this report.

APPENDIX D: RESUMES

ROBERT MCGRATH

VICE PRESIDENT

Professional Profile

Mr. McGrath has over 18 years of environmental consulting experience that includes managing and conducting field investigations, risk assessments, feasibility studies, and remedial designs at a variety of hazardous waste sites; directing due diligence liability assessments; and providing technical assistance to environmental litigation projects. For attorneys, insurers, and financial institutions, Mr. McGrath has evaluated site-specific environmental response actions and developed both technical approaches and future costs estimates to achieve site closure.

Mr. McGrath is the leader of Woodard & Curran's due diligence practice team located across our Maine, Massachusetts, Connecticut, and New York offices. During the development of the All Appropriate Inquiry standard, Rob and the Woodard & Curran team closely tracked the proposed changes to the environmental due diligence standards and have developed a program meet the All Appropriate Inquiry requirements. With the Woodard & Curran team, he has led third party review of due diligence assessments completed by others and developed focused summaries of key recognized environmental conditions that drive the transaction process. Mr. McGrath's due diligence experience includes evaluation of the potential environmental liabilities at a wide range of industrial and commercial properties for many different clients including private investors, developers, manufacturers, financial institutions, and government agencies.

Mr. McGrath has also managed many remediation projects including applications of chemical oxidation, enhanced bioremediation, bioventing, soil vapor extraction, air sparging, groundwater pump and treat, free product recovery, and soil excavation. He has designed and implemented treatability studies for bioventing, soil vapor extraction, soil stabilization, groundwater pump and treatment, air sparging, and chemical oxidation.

Related Experience

- Confidential Developer, Eastern Massachusetts. For this developer, Mr. McGrath has lead due diligence efforts at more than ten commercial and industrial properties in Cambridge and Watertown, MA. These assessments have included evaluation of potential subsurface liabilities that may impact future redeveloped use of the properties. Mr. McGrath reviewed

Education

M.S., Geology, University of Wisconsin
B.A., Geology, Amherst College

Professional Associations

National Groundwater Association
(NGWA)

Technical Expertise

Due Diligence
Hydrogeology

assessments conducted by others, evaluated their conclusions and summary of Recognized Environmental Conditions, and advised the developer regarding environmental liability associated with the property. Woodard & Curran has teamed with this developer, AIG Insurance, and the developer's financial institutions to successfully identify environmental liabilities and assist redevelopment of these properties.

- Confidential Real Estate Investment Trust, New England. Mr. McGrath and a team of Woodard & Curran due diligence and risk experts evaluated the environmental liabilities and risks associated with commercial properties at ten locations throughout New England. Many of the properties had former industrial uses and ongoing environmental response actions. The Woodard & Curran team's approach to assess the potential liabilities includes an evaluation of the effectiveness of previous response actions, assessing sub areas of the property to understand where risk may be most manageable, and assisting our client's legal team during negotiations with the current landowner.
- Confidential Investors, New York, New York. For a group of investors, Mr. McGrath directed review of due diligence assessments of 30 manufacturing facilities located in 12 states and the province of Ontario. Previous environmental assessment and cleanup actions had been completed at many of the facilities under both state- and federal-lead responders. Potential environmental liabilities associated with each property were reviewed and summarized in a focused site understanding compilation prepared for the investors. A future cost analysis, including decision tree analysis, was completed to quantify potential environmental liabilities.
- Confidential Real Estate Investment Trust, Nationwide. For a confidential nationwide real estate investment trust (REIT), Mr. McGrath provides third-party review services evaluating all aspects of potential environmental liabilities associated with the potential property acquisition. Within an aggressive timeframe to complete environmental due diligence, Woodard & Curran reviews environmental site assessments completed by others and evaluates a wide range of environmental information pertaining to the property for this REIT. Environmental reviews of manufacturing, commercial developments, warehouses, retail locations, and residential apartment complexes in locations such as Illinois, Virginia, Georgia, Florida, Texas, Missouri, Nevada, and California have been completed. Environmental issues including historic spill cleanup, current hazardous substance and petroleum storage and use, transformers, wastewater disposal, mold remediation, and compliance with state regulations have been assessed. Because of our independent analysis of site environmental conditions, the REIT has been able to manage potential environmental issues and successfully acquired numerous properties.
- Confidential Real Estate Developer, Eastern Massachusetts. For this real estate developer and manager, Mr. McGrath and the Woodard & Curran due diligence team have completed Phase I and Phase II environmental site

assessment activities at eight properties. At a property in Mansfield, MA, the developer sought to purchase a former ink manufacturing facility for redevelopment as an analytical laboratory. Before proceeding with the purchase, it was critical to determine whether the facility's historic use would impact its intended reuse. Woodard & Curran worked with the developer to develop an assessment strategy to evaluate both the impacts to the property from historical use and the potential risks to future sensitive laboratory equipment from off-gassing of the building materials. Woodard & Curran conducted a multi-phase assessment including a sub-slab soil survey, soil and groundwater sampling, and indoor air quality, which determined that the facility was suitable for reuse. During redevelopment, Woodard & Curran monitored building clean-out and designed and directed the construction of a passive sub slab depressurization system to prevent sub-surface vapors from affecting the future analytical laboratory. Redevelopment of the property was completed and the environmental analytical laboratory is now operational.

- Confidential Financial Institution, Hartford, Connecticut. For this large financial institution, Mr. McGrath managed over 100 real estate due diligence projects including preliminary environmental site screenings, site investigations, third party review, and site remediation projects throughout New England. Facilities have included print shops, automobile junkyards, gasoline service stations, manufacturing and commercial properties, residential properties, and others. The projects have included detailed background research and site ownership reviews, evaluation of the presence of, or threat of, releases of oil and hazardous materials, identification of sensitive receptors, limited field investigations, recommendations of the need for further investigation, estimates of future cost liabilities, and an evaluation of environmental liabilities.
- Confidential Insurance Company, Boston, Massachusetts. For this insurance company, Mr. McGrath completed numerous third party environmental reviews to assist insurance policy underwriting and risk management. Environmental reviews were completed on plating operations, petroleum tank farms, semiconductor manufacturers, wastewater disposal facilities and other commercial and industrial properties. Reviews are focused on appropriateness and completeness of environmental response actions and potential unresolved environmental issues. For each property, Mr. McGrath developed engineering cost estimates for remaining environmental response actions, including remediation expenses and potential National Resources Damages Assessments (NRDA).
- Confidential Chemical Co., Southeastern, Massachusetts. Mr. McGrath lead assessment activities and evaluation of environmental liabilities associated with a 11.25-mile pipeline. Modeled potential contaminant migration from an abandoned petroleum pipeline through the unsaturated zone to an unconfined aquifer 80 feet below ground surface. Researched site history through aerial photograph interpretation, review of archived materials, and interviews. Developed and implemented field investigation along pipeline

using passive soil gas, soil, and groundwater samples to evaluate presence of petroleum in subsurface attributable to pipeline. For this Tier 1A site, completed Immediate Response Action (IRA) Status and Completion Reports, Class A-1 Partial Response Action Outcome (RAO) Statement, and Phase II Scope of Work. Presented results of investigation at public meetings.

- Confidential Client, South Boston, Massachusetts. At a former semiconductor facility, Mr. McGrath oversaw Phase II Comprehensive Site Assessment (CSA) and Method 3 Risk Characterization. Researched site history using aerial photographs, fire insurance maps, city directories, and historical maps. Developed health & safety plan addressing both exposure to on-site contaminants as well as potential collapse of underground wood structure. Compared on-site subsurface materials to surrounding area fill material. Interpreted petroleum fingerprint analyses and compared results to petroleum standards. Based on comparison, determined site contaminants attributable to historic filling of property. Directed assessment of underground wood structure that was determined to be a 20-foot diameter wood tank that extended beneath adjacent city street. Determined wood tank contained coal tar and water. Developed in-place cleaning and closure approach acceptable to state and municipal agencies. Oversaw use of mobile steam boiler that heated contents of tank (approximately 23,000 gallons of water and 2,500 gallons of coal tar) and Vector to pump heated coal tar from tank. Monitored on-site remediation of tank water that used frac tanks and activated carbon prior to discharge into storm drain via National Pollutant Discharge Elimination System (NPDES) Exclusion. Directed filling of the tank with flowable fill. Prepared Phase II CSA Report, Release Abatement Measure (RAM) Plan and Completion Reports, Class A-3 Response Action Outcome (RAO) Statement and Activity and Use Limitation (AUL).
- Confidential Client, Wilmington, Massachusetts. Mr. McGrath lead a Removal Action activities under USEPA approval and direction consisting of the removal of contaminated soil, excavation and removal of over 700 buried 55-gallon drums, product, and other debris containing petroleum and chlorinated VOCs and metals from this abandoned waste disposal area. The project consisted of developing a Removal Action Work Plan, obtaining public comment at a public meeting, implementing and completing the Removal Action under EPA oversight, and presenting the results of the action to local residents and town officials during a public forum. The Removal Action was completed following Level B health and safety protocols.
- Confidential Client, Acton, Massachusetts. Mr. McGrath has directed the ongoing monitoring of groundwater and residual separate phase oil at a former manufacturing property. A historic release of paraffinic process oil from an underground storage tank (UST) impacted soil and groundwater, and oil recovery efforts were completed for more than 15 years by others. Additional assessment activities at the Site completed by Mr. McGrath have

evaluated the nature and extent of residual separate phase oil in the subsurface. Comprehensive efforts have been completed to assess the physical properties of the oil and subsurface materials to evaluate the recoverability of the residual oil. A conceptual site model was refined and remedial action alternatives were thoroughly evaluated to address the highly viscous residual oil remaining in the subsurface. After significant interaction with state regulators regarding a remedial approach that is feasible, protective of human health and the environment, and cost effective, a pilot test evaluating the effectiveness of in-situ chemical oxidation (Fenton's Reagent) was conducted. The pilot test involved construction of 10 injection wells, injection of approximately 10,000 gallons of hydrogen peroxide into the subsurface, and subsequent monitoring of the reduction in residual oil. Based on the results of the pilot test and on-going groundwater monitoring, a Response Action Outcome Statement has been prepared.

- Confidential Utility Company, Northampton, Massachusetts. Mr. McGrath lead a comprehensive assessment of a former manufactured gas plant site in Northampton, Massachusetts. The assessment evaluated potential continuing sources of DNAPL as well as the nature and extent of dissolved contaminants potentially migrating from the source area. Investigation activities have focused on the presence, lateral extent, and orientation of a lacustrine clay underlying the site which inhibited downward migration of the DNAPL. Assessment activities also included completion of test pits within the site and mitigation of potential MGP odors emanating from exposed soils by the use of a foam suppressant. Because the site is located on land owned by the City of Northampton, Mr. McGrath has lead significant efforts to inform local stakeholders regarding the risks associated with the site and the progress of site activities. A Phase II Remedial Action Plan and Phase IV Remedy Implementation Plan have been completed for this site.
- Confidential Developer, Watertown, Massachusetts. At a former manufacturing property, directed the removal of three underground storage tanks and assessment of subsurface impacts. Managed subsurface investigation that included test well installation beneath a building. Completed feasibility analysis of groundwater remediation methodologies. During property construction and re-development activities, oversaw chemical oxidation remediation of petroleum-impacted groundwater. Managed completion of Immediate Response Action (IRA), Method 3 Risk Characterization, and Class A-2 Response Action Outcome (RAO) to achieve site closure. Completed site closure less than one year after discovery of site contamination.
- Confidential Attorneys, Washington, DC. Provided technical support to attorneys and insurers for insurance settlement claim. Researched oil industry practices regarding reserve pits and drilling wastes. Interviewed regulatory agency personnel and reviewed archived records. Prepared technical memorandum on the history and regulatory status of reserve pits.

- United States Army Engineer District, Alaska. Managed remedial investigation and human health risk assessment of former Wildwood Air Force Station in Kenai, Alaska. Researched site history using aerial photographs, review of archived material, and interviews. Investigated soil and groundwater at 30 potential sources including USTs, ASTs, sewage and septic systems, rifle ranges, transformers, and landfills. Developed health & safety plan addressing each of the potential sources. Employed direct push technology, field GC, and immunoassay test kits to rapidly and cost effectively delineate contamination. Developed approach to distinguish naturally occurring organics from petroleum contamination. Managed development of risk-based cleanup levels and evaluation of remedial alternatives. Designed and implemented groundwater monitoring plan. Modeled groundwater flow with MODFLOW and contaminant fate and transport with BIOPLUME II. Negotiated cleanup levels and remedial approach with regulators. Managed and provided technical support to design of soil vapor extraction/air sparging system, landfill caps, and soil stabilization process. Managed community relations plan consisting of Open Houses, fact sheets, and video production.
- Alaska Department of Environmental Conservation, Alaska. Conducted oversight of the Alaska Pulp Corporation Sitka Mill Remedial Investigation for a team of stakeholders including state and federal agencies. Prepared health & safety plan addressing both land- and ocean-based sampling programs. Monitored soil and leachate sample collection on mill site and marine water and sediment sample collection in Silver Bay. Advised state and federal agencies on approach to groundwater investigation at Mill. Presented observations at public meeting.

DANIEL CLINTON

SCIENTIST

Professional Profile

Mr. Clinton has over five years experience in the environmental consulting field. Mr. Clinton has completed a significant number of Phase I Environmental Site Assessments and Transaction Screens according to ASTM protocols. These projects were performed under demanding time constraints, and the appropriate recommendations were presented to clients regarding the potential regulatory and environmental exposures and liability.

Additionally, he has completed a significant number of hazardous waste site assessments, subsurface evaluations, and underground storage tank removals throughout New England. Many of these projects have involved application of the Massachusetts Contingency Plan, state correspondence, conducting Department of Environmental Protection research, soil and groundwater sampling, and remediation. Mr. Clinton's projects have been performed at a variety of properties including those used for residential, commercial, and industrial purposes. Examples include several industrial mill complexes, gasoline service stations, automotive repair and auto body facilities.

Related Experience

- Confidential Financial Institution, Boston, MA. For this large financial institution, Mr. Clinton completed over 25 real estate due diligence projects including Transaction Screens and Phase I Environmental Site Assessments, and Phase II Environmental Site Assessments throughout Massachusetts. Facilities have included print shops, automobile service dealers and stations, automobile junkyards, gasoline service stations, multiple manufacturing and commercial properties, residential properties, and others. The projects have included detailed background research and site ownership reviews, evaluation of the presence of, or threat of, releases of oil and hazardous materials, identification of sensitive receptors, limited field investigations, recommendations of the need for further investigation, estimates of future cost liabilities, and an evaluation of environmental liabilities.
- Confidential Bulk Oil Sales Company, Worcester, MA. Mr. Clinton provided oversight of several underground storage tank removals in Massachusetts and Rhode Island. Mr. Clinton also provided remedial oversight and technical reporting under the Massachusetts Contingency Plan. The projects included contract bidding and management, client and state correspondence, and remediation closure documentation required by multiple Massachusetts and Rhode Island agencies and departments.

Education

M.S.E., Environmental Studies, UMASS Lowell

B.S., Biology/Environmental Studies, Hobart College

Registrations

OSHA 40 Hour HAZWOPER Training

OSHA 8 Hour Refresher Training

Professional Associations

Licensed Site Professional Association, Associate Member

- Confidential Real Estate Developer, Southborough, MA. Lead ASTM Phase I Due Diligence Assessment activities. Additional Phase II activities were planned and implemented by Mr. Clinton. Subsequent remedial activities, under provisions of the Massachusetts Contingency Plan, were lead and completed by Mr. Clinton under the supervision of a Licensed Site Professional.
- Confidential Plastics Manufacturing Company, Central MA. Authored Massachusetts Contingency Plan Phase I Initial Site Investigation and Tier Classification report, Massachusetts Contingency Plan Phase II/III report, Immediate Response Action reports, and Release Abatement Measure reports. This included the summarization of site soil data and the development of a preliminary site conceptual model. Mr. Clinton also provided oversight of all soil drilling activities, the completion of groundwater monitoring wells, soil vapor point installation, excavation oversight, and other remedial activities.
- Confidential Building Management and Realty Company, Framingham, MA. Lead ASTM Phase I Environmental Site Assessment at a large retail complex for a potential real estate transfer. Mr. Clinton reviewed multiple state environmental records and briefed the client on potential environmental liabilities.
- Confidential Developer, Boston, MA. Mr. Clinton authored both ASTM Due Diligence Phase I Site Assessment and Massachusetts Contingency Plan Phase I Initial Site Investigation reports for both vacant and developed parcels. These parcels were situated in a dense mixed commercial and residential area. Mr. Clinton researched property history using Sanborn Maps, aerial photographs, and other historical references. Summarized site soil data and developed a preliminary site conceptual model.
- Confidential Client, Central MA. Mr. Clinton oversaw spill response clean-up activities at a large industrial complex and completed required reporting and correspondences under provisions of the Massachusetts Contingency Plan. Mr. Clinton completed a Phase I Assessment and Phase II Environmental Site Assessment in accordance with the ASTM Standard Practice for Environmental Site Assessments; Phase I Environmental Site Assessments (E 1527-05). Based upon the result of the Phase II Assessment, Mr. Clinton provided additional consulting and reporting services under the provisions of the Massachusetts Contingency Plan. Completed comprehensive site reconnaissance. Researched site history using multiple historical sources. Wrote Phase I ESA Report and identified Recognized Environmental Conditions.
- Confidential Real Estate Developer, RI, MA. Lead Phase I Environmental Site Assessment at a commercial facility for a potential real estate transfer. Mr. Clinton conducted historical and municipal research, reviewed State environmental records, and completed the ASTM Phase I Assessment report under highly demanding time constraints.
- Confidential Retail Client, Central MA. Completed several ASTM Phase I Environmental Site Assessments for potential property acquisitions for corporate and retail expansion.
