<b>Included Documents</b>	<p><i>The following documents:</i></p> <ul style="list-style-type: none"> <li>A. <i>For each Attachment Type listed or checked above, an engineering drawing of replacement pole or existing pole with attached equipment. The drawing must show the location on the pole where each component of the Wireless Facility is attached or enclosed. Drawings should depict any underground portion of the typical installation for that Attachment Type.</i></li> <li>B. <i>Photo showing an example of each Attachment Type listed or checked above.</i></li> <li>C. <i>Photo mockup of each Attachment Type listed or checked above showing the appearance after the Approved Wireless Facility is installed.</i></li> </ul> <p><i>Engineering drawings and photo attachments should reflect the dimensions and characteristics of a representative actual City Pole or City Property Pole of the type to which the Approved Wireless Facility design applies rather than generic examples. Where there is considerable variation among City Poles/City Property Poles of a particular type (e.g. traffic signals), drawings can show a typical installation, provided that equipment volumes and attachment locations will not vary significantly from one installation to the next in ways that are material to the City's interests.</i></p>
<b>RF Compliance Information</b>	<p><u>  X  </u> Facility conforms to information already on file      <u>      </u> RF information attached</p>
